

Package plans and frames

Package plan defines which types of mobile services are included in the **package frame**, defines a specific package code, monthly quota and total monthly price of package.

Package frame represents a monthly quota of various services that are defined through a particular phone and package plan.

At the beginning of each month (the first day of the current month), package frames are granted to the phones. It is executed automatically.

Package plans are determined by:

- package code,
- payment model,
- types of services that are included in the package
- the amount of particular service
- monthly price
